

Sana Chouikhi

Software Engineer | ERP Solutions & Business Automation | DevOps & Cloud | Backend Systems

Tunis, Tunisia | sanachouikhi1999@gmail.com | +216 26 603 287 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer specialised in ERP platforms, backend engineering, business automation, and production infrastructure. Proven ability to design and deliver scalable technical solutions across operations, finance, APIs, cloud environments, and secure systems. Strong track record improving efficiency, reliability, and deployment velocity through automation and engineering best practices. Experienced in cross-functional teams and international remote collaboration.

TECHNICAL SKILLS

ERP & Automation ERPNext, Frappe Framework, n8n, Workflow Automation, Business Process

Backend Engineering Python, Django REST Framework, Node.js, Express, REST APIs, System Design, Java

DevOps & Cloud Docker, Docker Compose, GitHub Actions, OVHcloud VPS, AWS, Linux Administration

Infrastructure & Security HashiCorp Vault, OxaHost DNS, Plesk, SMTP, SPF, DKIM, DMARC, SSL/TLS, Linux Hardening

Observability Prometheus, Grafana, Loki, Wazuh

Databases MariaDB, MySQL, MongoDB, Redis, SQLite, Firebase

Frontend React.js, Angular, TypeScript, JavaScript, Tailwind CSS, Bootstrap, HTML/CSS

Mobile Flutter, React Native, Android

IoT & Embedded MQTT, RTSP, Arduino, Raspberry Pi

Tools & Methods Git, GitHub, GitLab, Jira, Agile/Scrum, Clean Architecture, Code Review

Languages Arabic (Native), French (Fluent), English (Fluent), German (Basic)

PROFESSIONAL EXPERIENCE

ERP Software Engineer & IT Systems

Mar 2025 – Present

Arkeyez, Tataouine, Tunisia

- Delivered custom ERP modules using ERPNext and Frappe across multiple business units
- Automated enterprise workflows with n8n, reducing manual processing time by **80%**
- Designed and deployed secure REST APIs for internal and external system integration
- Implemented CI/CD pipelines with GitHub Actions, significantly reducing deployment time
- Managed containerised production stack (ERPNext, MariaDB, Redis, Nginx) on OVHcloud VPS
- Set up monitoring with Prometheus, Grafana, and Loki plus Linux hardening and SSL/TLS automation
- Architected complete enterprise email infrastructure including SMTP relay, SPF, DKIM, DMARC records, and DNS management via OxaHost

Full-Stack Developer (Web & Mobile)

Sep 2024 – Feb 2025

Freelancer.com, Remote

- Delivered multiple production-grade applications for international clients across various industries
- Engineered backend systems with Django REST Framework and Node.js / Express

- Created responsive frontends using React.js and cross-platform mobile apps
- Integrated third-party APIs including payment, messaging, and mapping services
- Managed Git workflows, code reviews, and technical documentation

Software Engineering Intern

Feb 2024 – Jul 2024

Enova Robotics, Sousse, Tunisia

- Architected a real-time IoT monitoring platform for a fleet of autonomous security robots
- Built full-stack web application using React.js, Node.js, MongoDB, and Python
- Integrated MQTT for robot command/control and RTSP for low-latency live streaming
- Designed dashboards for tracking, health metrics, and alerts improving decisions by **40%**
- Automated PDF and Excel reports for daily operations and maintenance schedules

Mobile Application Developer Intern

Jul 2023 – Aug 2023

Online VIP Consulting, Remote

- Developed key features for a banking mobile application using React Native
- Integrated multiple REST APIs, improving overall responsiveness
- Collaborated with remote backend teams to optimise API contracts and reduce errors

Observation Internship — Mobile App

Jul 2022 – Aug 2022

Tunisie Telecom, Medenine, Tunisia

- Built a complete mobile application for field site management using Flutter, Node.js, and MySQL
- Implemented interactive maps, site details, photo uploads, and QR code scanning
- Reduced field engineers' issue reporting time by **50%**

Final Year Project — Virtual Classroom

Feb 2021 – Jun 2021

Sindibad Group, Tunis, Tunisia

- Built a real-time virtual classroom platform (web + mobile) used by hundreds of students
- Implemented WebRTC for audio/video calls, whiteboard, live chat, and screen sharing
- Developed backend systems using Node.js, Socket.io, and MySQL

Advanced Internship — Management System

Jan 2020 – Feb 2020

Institut des Régions Arides, Medenine, Tunisia

- Developed a full-stack internal management system using PHP, Bootstrap, and MySQL
- Supported employee management and equipment tracking processes
- Reduced manual record-keeping and search time significantly

Introductory Internship — Website Development

Jan 2019 – Feb 2019

Regional Directorate, Medenine, Tunisia

- Built a responsive institutional website using HTML, CSS, Bootstrap, and JavaScript
- Optimised performance for fast loading and accessibility

EDUCATION

Engineering Degree in Computer Science

2021 – 2024

ISSATS Sousse — Higher Institute of Applied Sciences and Technology

Bachelor's Degree in Embedded Systems

2018 – 2021

CERTIFICATIONS

Full-Stack Application Development with Frappe Framework	2026
Python Programming Certification	2020
C Programming for Embedded Systems	2020
Introduction to IoT Systems	2020
JavaScript, Bootstrap & PHP Certification	2019
Networking Fundamentals	2019
